SUMMARY

MERN stack developer focused on building scalable, responsive, and user-friendly web applications using MongoDB, Express.js, React, and Node.js. Completed 10+ projects, improving client efficiency and user experience. Skilled in API integration, performance optimization, and writing clean, efficient code. Always eager to learn and work with emerging technologies.

EXPERIENCE

Freelance Full Stack Developer

Freelance Projects

January 2025 - Present, Remote

- Developed fully responsive and high-performance web applications for multiple clients using MongoDB, Express.js, React.js, Node.js, Tailwind CSS.
- Built a **PayTM-like digital payment platform** for a client, implementing secure payment gateway integration, user authentication, and real-time transaction updates.
- Designed and developed a complete **e-commerce website**, featuring product listing, cart functionality, user management and secure checkout processes.
- Collaborated directly with clients to gather requirements, provide technical consultation, propose creative solutions, and iteratively implement feedback to deliver tailor-made applications.

Full Stack Developer (Instructor)

Aptech Learning Institute

February 2024 - June 2024, Karachi

- Delivered comprehensive training programs in full stack development to over 200 students, utilizing technologies such as Node.js, React, and MongoDB, which led to a 95% student pass rate and improved job placement outcomes.

Projects

Toutube + Twitter Project

- Developed a full-stack web application combining features of YouTube and Twitter, enabling users to upload videos, share posts, like, comment, and follow others.
- Built with React, Node.js, MongoDB, and real-time updates for an engaging social media experience.

PayTM Project

- A Paytm-like digital payment app with real-time transactions, secure authentication, wallets, and integrated payment gateways, built on the MERN stack.
